

KU's AI Declaration

Declaration on the use of generative AI tools
☒ I/we have used generative AI as an aid/tool (<i>tick the box</i>) ☐ I/we have NOT used generative AI as an aid/tool (<i>tick the box</i>) <i>If the use of generative AI is permitted for the exam, but you have not used it in your assignment, you simply need to tick that you have not used GAI and do not need to complete the rest.</i>
List which GAI tools have been used, including a link to the platform (if possible): OpenAI ChatGPT https://chatgpt.com/
Describe how generative AI was used in the assignment: 1) <i>Purpose (what have you/we used the tool for)</i> We used generative AI during the project as a support tool for sparring and problem solving. It was mainly used to help understand technical concepts, get suggestions for possible solutions, and identify or correct smaller coding errors. 2) <i>Work phase (when in the work process did you/we use GAI)</i> AI was used during the development process when we encountered errors, needed help understanding parts of the assignment, or wanted input on documentation and structure. 3) <i>What did you/we do with the output (including whether you/we edited the output and continued working with it)</i> The output was used as inspiration and support. We adapted the suggestions to fit our own project, database structure, and code. The code and documentation were then reviewed, adjusted, and tested by us before submission. <i>NB. GAI-generated content used as a source in the assignment requires correct use of quotation marks and source references. Read the guidelines from the University of Copenhagen Library on KUnet.</i>
